

ZMC302AU ZMC124AY

ABI Desktop Connector modules are ideal for use in desks and floor cavities. Connectors are all "push in" (on desktop and underneath) for quick and simple installation.

The installed desktop connector module is neat and simple - a simple push in the center of the top panel will open the panel and the next push will then lock it closed. The operation is controlled by a hydraulic spring.

The two models available have combinations of AV connectors plus a 240v Australian 3-pin socket.

Cutting template, screws and securing plate are supplied with the unit.

ZMC302AU shown (desktop side - open)

ZMC302AU

- Power (240v Aust. 3-pin socket)
- 1 x VGA socket
- 1 x Video RCA socket
