MOBILE6/8 Mobile Panel Stands

Stylish executive mobile stand suitable for situations where the display panel requires to be moved from room to room or different locations.

Constructed from scratch resistant powdercoated steel the MOBILE6 has a shelf for laptop and features 6 heavy duty castors (2 locking) to ensure 4 castors are on the ground at all times for extra stability. The stand has been designed so it can be positioned close to the wall for economy of space, and has been simplified to four panel height settings so it can be manually set at the appropriate height for the targeted audience. Suitable for sizes to 80". The MOBILE 8 has a heavier duty steel upright to suit 80" and larger models.

There are holes in the centre upright for cable management and a back upright cover for a neat and complete finish.
