

Express Portable tripod screen

*R - 1:1 format

*DR - 4:3 format

*HDDR - 16:10 format

EXPRESS tripod screens are a good economical choice. Featuring a wide-base sturdy tripod stand, keystone eliminator and spreader bar to maintain a flatter screen, they can provide a projection surface that can be quite large and yet mobile.

Express tripod projection surfaces are standard 1:1 gain matt white fabric, and may up to 2.4 metres wide.

The 3cm black border adds an important optical benefit for the viewer. It frames the image by clearly defining the edge of the viewing space, and soaks up "light spill" around the edge of the projected image, giving the image a clean edge.

The compact steel screen case is finished in white powdercoat, and the tripod components are demountable for transportation.

Carry bags are available as a handy optional extra.

Express screens are covered by 3 year warranty

SPECIFICATIONS

PRODUCT CODE	FORMAT	DIAGONAL (M/ INCHES)	SIZE OVERALL (MM)	VIEWING AREA (MM)	CASE LENGTH (MM)	CASE H/V (MM)
