

EconoElectric Plug'n'Play motor screen

Motorised front projection screen

Inline switch control

Plug n Play

THE EconoElectric screen is a high quality motor screen in a standard design case. It is designed to suit the general market where installation does not require an electrician, or specialist installer.

Plug and play straight out of the box!

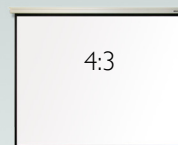

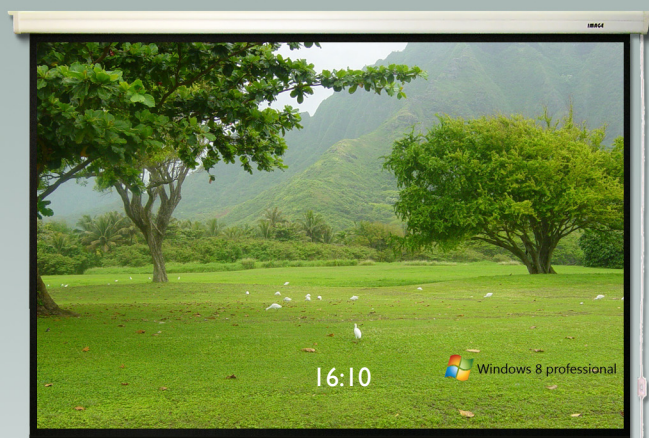

Plugs in to any household power point and screen functions are controlled by simple inline switch. Options are available for control by remote or wall switch.

Wall mounting brackets are incorporated into endcaps.

The EconoElectric EC has a matt white screen surface with black borders, and is available in 1:1, 4:3, 16:9, and 16:10 formats.

The extra black leader at the top of the shorter diagonal screens enables the screen position to be adjusted to a height to suit the user, with sufficient black leader to drop the screen to the correct viewing position.

EconoElectric screens are covered by a 3 year warranty
